

LAU-131 A/A

EXTENDED LENGTH LAUNCHER

Airborne Accuracy.

Primarily utilized by the U.S. Air Force, the LAU-131 A/A is an extended length version of the LAU-131/A. This modification makes the LAU-131 A/A capable of firing APKWS II. This launcher often gets mistaken for the LAU-68 F/A, which can be distinguished by its thermal coating. Unlike the LAU-131/A, the A/A only has one connector at its aft.

7-ROUND

EXTENDED LENGTH

FIXED /
ROTARY WING
AIRCRAFT

CAN BE USED
WITH APKWS™
